

NEBGH encourages and invites hospital CEOs in NY and CT to participate in the annual **Leapfrog Hospital Survey**. In April, 140 hospitals were asked to complete the Leapfrog quality performance survey. This is the gold standard for assessing hospital safety, quality and efficiency and results are publicly reported. Participating hospitals achieve improvements that translate into millions of lives and dollars saved.

We are asking employers to take two actions to support transparency of hospital patient safety in our area:

1. Contact those hospitals where your organization spends the highest dollars and let them know you want them to participate in this important survey.
2. Contact your Health Plan account representative to let them know that Leapfrog results are important to you and you wish their network hospitals complete the survey.

Click [here](#) for more details on the Leapfrog Group and [here](#) for further details on the survey.
